FILMOP INTERNATIONAL PRIMARY GOAL IS TO DESIGN AND CREATE THE BEST CLEANING SYSTEMS IN THE FULL RESPECT FOR THE ENVIRONMENT

A world leader Italian company in the professional cleaning market

Filmop International was founded in the early 70s as a company specialized in the **design and production of manual cleaning equipment** for professional use.

The **40,000-square-meter plant** located in northeastern Italy was joined by a **French distribution branch** in 1997 and an **American branch** in 2004, strengthening the company's presence in their respective markets.

Proud to spread "**Made in Italy**" around the world, today Filmop International **exports to more than 80 countries** with the utmost speed, reliability and efficiency.

Mission

Filmop International has always been inspired by the following main principles, that are surely behind its growth and development:

- a strong push for **innovation** and **research**
- a constant **attention towards customer's satisfaction**
- unequalled **production flexibility**
- a considerable **quick order processing**

40.000 sqm

50 YEARS OF SUCCESS IN THE
PROFESSIONAL CLEANING SECTOR

An Italian reality acknowledged worldwide

Filmop International's is a **story of quality that began in 1974** and has resulted in **over 4000 items** and has been awarded with prestigious **company and product certifications**. The achievements of half a century of commitment and a product range full of successes have made the company an authoritative leader, a trusted partner and the undisputed protagonist of an ever-evolving cleaning industry.

Today Filmop International is a widely recognised institution on the international cleaning scene and a point of reference for cleaning professionals. The company proudly **spreads the excellence of Made in Italy** by exporting to **over 80 countries** worldwide, in many of which it is the main supplier.

FILMOP INTERNATIONAL IS A TRUSTED PARTNER TOTALLY ORIENTED
TOWARDS CUSTOMER'S SATISFACTION

Your trusted partner

Those choosing Filmop International know they can rely on a **qualified partner**, organized to ensure **prompt order processing with fast and on-time deliveries**.

The company also stands out for its great **production flexibility**: each new customer request receives an immediate and careful analysis by the technical office to identify and develop the best possible solution.

Pre- and after-sales service helps customers to choose the most suitable cleaning system for their specific needs, supporting them with on-site inspections and training courses on site or in the exclusive setting of **Filmop Academy**.

Finally, Filmop International provides a range of **marketing tools** aimed at increasing the depth of the range of products and systems offered:

- **web site** with detailed and constantly updated information
- freely accessible **catalogs and product sheets**
- **FilmopTalk online magazine** with industry articles and interviews
- **You Tube channel** with videos and tutorials
- **Alpha Configurator app** to design customized trolleys
- **Filmop Academy** for product and procedure training
- **showroom** for the wide range on offer

FILMOP INTERNATIONAL HAS DEVELOPED SKILLS TO ACHIEVE HIGH BUSINESS AND PRODUCT STANDARDS

Certification ISO 9001

Certification ISO 14001

Fulfillment of obligations under the European REACH regulation

The certifications of Filmop International

The quality of the products and services offered by the company is guaranteed by the following certifications:

- **2000 | Quality Certification UNI EN ISO 9001:2015:** Filmop bases its growth on an organized business system with efficient management, suitable facilities and adequate skills
- **2011 | Environmental certification UNI EN ISO 14001:2015:** Filmop has chosen to implement an environmental management system to control the impacts of its activities on the ecosystem
- **2012 | Second Life Plastics:** Filmop offers a wide range of trolleys, bins and buckets with components made using recycled plastics
- **2015 | EU Ecolabel:** Filmop has obtained for many cloths, mops, flat mops and kentucky mops the eco-label that rewards the best environmentally sustainable products by qualifying them on the market
- **2022 | Carbon Footprint Systematic Approach:** Filmop has obtained the certification of the system for calculating the climate footprint of the trolleys, carried out in accordance with UNI EN ISO 14067:2018
- **2023 | EU Ecolabel:** Filmop has obtained for some Alpha wheeled cabinets the Type I environmental label identifying the best products from a sustainability point of view

The company fulfills its obligations under European Regulation **REACH**: it purchases raw materials from trusted and qualified suppliers, who declare that they comply with current supply chain regulations.

Finally, it meets the criteria of **BRC**, a structured management system for hygiene control and product safety.

AT THE FOREFRONT OF ENVIRONMENT OFFERING
PRODUCTS AND CLEANING SYSTEMS IN COMPLIANCE
WITH CAM CRITERIA

CAM criteria

The Minimum Environmental Criteria (CAM) for the contracting of **cleaning** services in **civil environments** and **cleaning and sanitising of healthcare environments** include a number of technical specifications, contractual clauses and awarding criteria that aim to **minimise the environmental impacts** associated with the relevant activities and supplies.

Filmop International has over time produced **countless products and systems in line with the requirements set out in both CAMs:**

TECHNICAL SPECIFICATIONS

- Dosing systems that avoid operator discretion: **Equodose dosing device to control the degree of textile soaking**

CONTRACTUAL CLAUSES

- Reusable flat microfibres for chemical reduction: **wide range of microfibres with dTex \leq 1**
- Label according to EN ISO 14024 for at least 30% of the microfibres: **EU Ecolabel-certified microfibre head mops and mops**
- Recycled textiles for dusting operations: **range of recycled cotton dusting mops**
- Soaking systems reducing water and chemical consumption: **Equodose dosing device for soaking textiles directly on the trolley**
- Trolleys with wringer with two buckets or bucket with double basin: **washing and multi-purpose trolleys that separate clean and rinse water**
- Trolleys with buckets in different colours depending on use, made of 50% recycled plastic by weight: **wide range of trolleys complete with buckets in different colours, made of suitable percentages of recycled plastic**
- Solutions for waste management: **AlphaSplit trolleys to collect different types of waste in special sections and a complete range of colour-coded waste collection bins**

AWARDING CRITERIA

- Exclusive use of microfibres with UNI EN ISO 14024 compliant labelling: **wide assortment of EU Ecolabel-certified microfibres**

A successful range of products

For Filmop International, being successful means being able to **understand, read and be ahead of market needs**. This aptitude has led it to take a **leading role** in the process of change that has affected the professional cleaning industry over the past three decades.

In particular, Filmop International was the first Italian manufacturing company with a special attention to:

- in the importance of **alternative materials to metal** such as polypropylene, which is strong, lightweight and totally recyclable
- in the need for **separation of clean water from rinse water** as a basic prerequisite for professional cleaning
- in the value of **ergonomic cleaning systems** that can improve operators' working conditions

These three concepts are the main pillars of a successful business and production policy, that has led to a complete range of products for professional cleaning with **more than 4.000 finished items**.

SOME OF THE
PATENTED SYSTEMS
 THAT REVOLUTIONISED
 CLEANING

Globo System

**THE FIRST AND ONLY UNIVERSAL
 CLEANING SYSTEM**

Universal system that can be used
 like any traditional system, ensuring
higher performance

Click Safe

**ENSURED HYGIENE WITH
 CONTACTLESS RELEASE**

Touchless system that allows
 detaching the mop while avoiding
 any contact with bacteria and
 viruses

ErgoSwing

**MAXIMUM RESULTS WITH
 MINIMUM EFFORT**

Ergonomic system designed to
 follow the **S-shaped movement**
 while minimising strain

INNOVATION LEADS THE WAY

50 years of success. Over 4000 products.
More than 100 patents.

A strong drive for innovation and relentless research and development work have paved the way, resulting in a succession of inventions that make Filmop products **unique and unrepeatable**.

Technological innovations developed over time have made history in professional cleaning, contributing concretely to make it more **effective and efficient**.

Lock System

**UNEQUALLED VERSATILITY
TO GET ANYWHERE**

System that allows to lock/unlock the joint to **facilitate the cleaning of walls and ceilings**

Drop & ErgoDrop

**CONVENIENCE AND SAFETY
AT YOUR FINGERTIPS**

Ready-to-use system allowing **cleaning solution to be dosed according to actual needs**

Uni-Connect

**A COMPLETELY CONNECTED
CLEANING SYSTEM**

Innovative system that **connects glass, surface and floor cleaning equipment instantly and safely**

Boost

+20% WRINGING, -52% EFFORT

Wringing system that **wrings 20% more with half the effort** than traditional wringers

FILMOP INTERNATIONAL'S CONTRIBUTION TOWARD SUSTAINABLE DEVELOPMENT IS REALIZED IN ITS COMMITMENT TO ENVIRONMENTAL PROTECTION

Equodose® adjustable dispenser to save cleaning solution

AlphaSplit System to facilitate separate waste collection

Commitment to sustainable development

In an age in which the preservation of our environment is the world top priority, Filmop International is strongly engaged and oriented towards a policy of sustainable development.

Since its origins, the company has followed a **precise path toward eco-sustainability** that has enabled it to achieve important results over time:

- Corporate and product **environmental certifications**
- Selection of qualified suppliers according to the **European REACH Regulation**
- Use of **raw materials of recycled origin**
- Development of **products and systems with low environmental impact**
- Products made from separable materials and thus **recyclable at end of life**
- **Production and use of solar energy** thanks to photovoltaic systems
- Efficient organization of the **separate waste collection and leftovers**
- **Environmental labelling of packaging** to promote proper disposal

Wide range of high performance dTex ≤ 1 microfibers

 Products with Plastic
 Second Life certified
 components

Certification of the Carbon Footprint Systematic Approach

Filmop International has decided to keep on its path toward eco-sustainability by taking a further step forward: extensive analysis, planning and development work has enabled the company to implement a **system for quantifying Product Carbon Footprint** based on a systematic approach.

The work done was recognized by an independent, accredited verification company that **certified the implemented system** after carrying out a detailed evaluation.

Through the Carbon Footprint Systematic Approach, Filmop International can **calculate the climate footprint of the entire range of trolleys**, from buckets and mop trolleys to multi-purpose and service trolleys.

Counting of **CO₂e** is done for **every phase of the product life cycle**: from raw material sourcing to production, through transport and consumer use to end-of-life disposal.

Green Looks good on us

DETECTING THE CLIMATE FOOTPRINT OF PRODUCTS AND TURNING IT INTO OBJECTIVE DATA ENABLES SPECIFIC ACTIONS TO BE IMPLEMENTED TO PROMOTE SUSTAINABLE DEVELOPMENT

CARBON FOOTPRINT SYSTEMATIC APPROACH

INVESTING IN RENEWABLE ENERGY
TO CREATE A BETTER FUTURE

GREEN ENERGY

Production and use of clean energy

Filmop wants to play a concrete role in promoting sustainable development and countering global warming, which is why it chose to **minimise the impact of its business activities** by installing a **photovoltaic system** at its headquarters in 2011.

The production of **solar energy** for self-consumption or feeding into the grid **avoids the release of tonnes of CO2 into the atmosphere each year**.

Carbon offset projects

In addition to its use of sustainable energy for more than a decade, Filmop has chosen to join major **international carbon offset projects** that include the **installation of renewable energy plants in developing countries** to generate clean energy by facilitating access to it for local populations.

 SUSTAINABLE DEVELOPMENT GOALS

CHOOSE PRODUCTS WITH ENVIRONMENTAL CERTIFICATIONS: A RESPONSIBLE CHOICE TO PROTECT THE ENVIRONMENT

EU Ecolabel

Filmop International has obtained for many **cloths, mops, flat mops and Kentucky mops** and for some **Alpha** wheeled cabinets the prestigious **EU Ecolabel** certification, the EU **environmental label** that rewards the best environmentally sustainable products.

The certification attests to the low environmental impact of products after analyzing their sustainability throughout their life cycle through a very selective set of parameters established by the European Community.

The full range of EU Ecolabel-certified products is available in the European ECAT registry:

<http://ec.europa.eu/ecat/products/en/22016/n-a>

The certified product lines

Plastic Second Life

Filmop International is the first Italian company in the cleaning equipment sector to have obtained **Plastic Second Life** certification, the first **European label dedicated to recycled plastics** created to guarantee and easily identify goods made using recycled plastics.

Filmop offers several lines of **trolleys, bins and buckets** with components made with significantly higher percentages of PSV polypropylene than the minimum required, while maintaining original colors and the same quality.

**plastic**

FILMOP INTERNATIONAL TEXTILES PROTECT
THE ENVIRONMENT AND OUR HEALTH

Release of microplastics: test passed with flying colours

The presence of **microplastic particles** in aquatic ecosystems has attracted general attention in recent years, becoming the subject of an increasing number of studies motivated by environmental and health concerns.

Eco Multi-T manual cloth and **Micro-Activa, Twist-Tuft, Rapido Super Extra, Rapido Super, Rapido, Duo Face Wash Basic, Puli-Brush** and **Puli-Scrub** mops were tested by a highly specialised independent laboratory for the release of microplastics.

All products passed with flying colours the test: the analysis showed particularly low losses in washing and rinsing by the Eco Multi-T cloth and the Micro-Activa, Twist-Tuft, Duo Face Wash Basic, Puli-Brush, and Puli-Scrub mops which received the highest rating. In addition, low release was found regarding the Rapido Super Extra, Rapido Super and Rapido mops.

LOW ENVIRONMENTAL
IMPACT PRODUCTS

WITH ALPHA CONFIGURATOR YOU CAN ENJOY DESIGNING
A CUSTOMIZED CLEANING TROLLEY

Pc

iPad

Tablet

Your ideal trolley with a click

Alpha Configurator is Filmop International's application that allows you to **create in a few simple steps a customized trolley**, configured according to your specific needs: you can freely choose the number of units, washing systems, doors, accessories, colors and more, thus creating the ideal trolley for every cleaning need.

The **3D version for PC, tablet and iPad** allows you to **customize the trolleys in every detail**: the many combinations offered and the wide range of products and accessories available, including the latest news, make the configuration possibilities endless.

FILMOP INTERNATIONAL GUARANTEES QUALITY PRODUCTS, THE RESULT OF CAREFUL RESEARCH AND SELECTION OF RAW MATERIALS

Washing temperature

Cold water washing

Do not dry clean

No drying-chamber

Maintenance and care of textile products

To keep performance unchanged over time and help extend the life cycle as much as possible, please pay special attention to the **washing instructions** below:

- Follow carefully the washing instructions and warnings on the detergent packaging (temperature and dosing) before washing
- Always pre-wash microfiber mops in cold water without detergent to remove residues of the chemical solution
- We recommend the use of normal detergent for textiles, no fabric softener
- We suggest to use the specific net bags for the mop washing
- Do not use chlorine or bleach
- Do not use softener
- Use alkaline detergents with Ph <11

For more details **see the product data sheets**, which can be freely downloaded from the website www.filmop.com.

General safety of plastic, metal and mixed products

The items we market do not require product certification, as they correspond to the definition given in Legislative Decree 206 of 06.09.2005.

Based on such decree, a safe product is a product that during normal or reasonably predictable use, including in terms of duration, does not pose any hazards or only minimum hazards, compatible with the use of the product itself.

The items listed above are not within the scope of any of the European Product Directives, in particular they do not fall under the Machinery Directive 93/37/EC, the Low Voltage Directive 73/23/EC or the Electromagnetic Compatibility Directive 89/336/EEC.

Also, no specific risks connected with the cleaning items or systems of relevance have been identified.

The material used are all materials which don't constitute a chemical health hazard to the end users.

The company constantly monitors the materials used, keeping their safety data sheets on file.

As far as safety is concerned, it must be pointed out that the product may not be used by non-professional users, or on non-level surfaces with slopes exceeding 1%.

It is also recommended that the items are stored away from the reach of children.

Lastly, the company shall not be held responsible for any damage caused by the substances used by operators.

Safety of electric items

Our electric items - Aura range - meet the 89/336/EEC Electromagnetic Compatibility Directive and are all CE marked.

Before using electric items, the operator must read the instruction booklet, which must be strictly followed. For any doubts, the operator can refer to the Manufacturer or the available Support Centres.

The materials used for the manufacturing of electric items are all materials that do not pose any chemical hazards for the health of users. The company constantly monitors the materials used, keeping their safety data sheets on file.

Lastly, the manufacturer shall not be held responsible for any damage caused by the operator using the electric items.

Compliance Declaration

All items we market comply with current safety laws and are covered by a "product liability" **insurance policy**.

Dust mopping with flat mops and the specific mop holders is the ideal system to collect and keep the dust, unlike the household brooms which just raise the dust to let it deposit on the floor again afterwards. Filmop dust mops are available in different sizes from 40 to 160 cm.

YARNS

Natural fiber coming from recycling with thin yarn that effectively removes the smallest particles of dust and dirt, ensuring excellent cleaning results.

100% COTTON

Natural mixed fiber coming from recycling with highly absorbent thick yarn that attracts, captures and keeps dirt, releasing it only during mop washing.

COTTON

Regenerated natural fiber coming from recycling with thin yarn ideal for dusting, as it collects and keeps effectively dust from any surface.

FIRST RATE

A high electrostatic charged fiber that collects and attracts dust particles, thus increasing the performances of the mop.

ACRYLIC

Microfiber is a synthetic fiber that penetrates into the microporosity of the floor, retaining the dirt removed and releasing it only during machine washing.

RAPIDO SUPER EXTRA

Please, refer to pages 28-29 for washing instructions.

FLOOR SQUEEGEES

Damp mopping is very important because it allows to collect and keep also the smallest dust particles reducing micro-organisms in the air. Filmop offers systems using mop holders with rubber blades, with foam sole or with strap tape system, combined with pre-soaked cloths or cotton gauzes. The special trapezoidal shaped mop holders allow to clean edges and hard-to-reach areas, they are light and handy.

All Filmop mop holders can be equipped with **Lock System** joint

MOP HOLDERS WITH STRAP TAPE SYSTEM

Thanks to the wide range of accessories, like foam soles, mop and pads, the mop holders with strap tape system can be used for different cleaning operations.

CLOTH HOLDERS WITH RUBBER BLADES OR LAMELLAS

The 30° inclination of the flexible rubber blades allows to collect all dust particles assuring the utmost hygiene also on uneven floors. The cloth holders with rubber blades or lamellas are **washable** and **sterilizable**.

MOP HOLDER WITH FOAM SOLE

The mop holders with foam sole are light and practical, they are suitable also for uneven surfaces. Available in 2 versions: cloth holders with incorporated foam sole or cloth holder with strap tape system with removable foam sole

Unlocked joint: floor mopping

Locked joint: cleaning of walls and ceilings

Dry-Up, the high absorbent disposable cloth made by Filmop, lets you solve any loss of liquid instantly: thanks to its performances, surfaces dry very quickly with the highest hygiene, allowing to continue with the ongoing activities.

- **High absorbency in a few seconds:** the high absorbing polymers of the cloth soak up till 1000 ml from 30 to 150 seconds. Absorbing time and capacity depend on the type of liquid: Dry-Up can indeed absorb water, drinks, chlorine bleach, oil, urine and blood.
- **Maximum safety and hygiene:** the absorbed liquid is bonded safe in the cloth and transformed into gel, allowing a safe and hygienic disposal of the cloth, neither dripping nor trickle, and avoiding cross contamination.
- **High versatility:** perfect to be used in healthcare facilities, elderly homes, restaurants, bars, supermarkets, communities, schools, airports, public toilets, industries, mechanical workshops.

YouTube

Put Dry-Up onto the leakage of liquid and wait until it absorbs it completely. If necessary, move it slightly without lifting it to absorb the rest of the liquid. Do not step on it, because it could be slippery.

Remove Dry-Up. The liquid, now transformed into gel, is bonded safe in the cloth, avoiding dripping and trickling. Dry-Up leaves the surface completely dry, allowing a fast restart of ongoing activities.

Dispose of the cloth as general waste (please, comply with the specific protocol for hospital waste). Then proceed with the cleaning of the area.

DRY-UP - super-absorbent disposable cloth

Jobby with telescopic handle

Jobby dustbin is also available with an aluminium **telescopic handle** to facilitate collection operations and protect health.

The possibility of adjusting the length of the handle on the basis of the height of the operator prevents the onset of occupational diseases due to the repeated assumption of incorrect postures.

Handle adjustment

Pocker dustpan with wheels

The Pocker dustpan has a practical **handle** and 80 mm **wheels** for better ergonomics and practicality of use and transport.

Pocker is also available in the **4-wheel version** for easier manoeuvrability and handling, particularly during the collection of waste.

YARNS

Natural highly absorbing fiber. Available in Open-end cotton. Fitting all kinds of inside floors.

COTON

String mop made of microfibre stripes with high absorbing power, it glides easily on the surfaces ensuring an effective cleaning. Fitting all kinds of inside floors.

STRIPE MOP

Microfibre mop with high absorbing power, it penetrates into the micropores of the floor, cleaning and thoroughly degreasing it. Fitting all kinds of inside floors.

DREAM MOP

Mop made of synthetic fiber, it cleans effectively and assures a high washing autonomy. Great resistance to aggressive chemicals such as chlorine and hypochlorite. Advised for food and chemical industry.

SYNTHETIC MOP

Please, refer to pages 28-29 for washing instructions.

YARN MANUFACTURING PROCESS

LOOPED YARN

It grants a longer life of the mop: this yarn processing prevents from mop fraying and linting.

TWISTED YARN

It guarantees a more compact yarn making easier the cleaning operations.

BAND

It guarantees a uniform distribution of the mop strings on the floor and avoids getting trapped into possible obstacles in the cleaning area.

KIND OF SUPPORT

5 cm support.

8 cm support.

EU ECOLABEL CERTIFIED PRODUCTS

Filmop International has obtained for the line of mops **mop Open-end** and **Master Lux** the prestigious **Ecolabel UE** certification, the European Union eco-label that rewards **best eco-friendly products**.

The certification attests the **low environmental impact** of the products after having analyzed their sustainability throughout their entire life cycle through a series of very selective parameters, established by the European Community.

Microfiber: the cleaning ally

Microfiber is a **fiber with a fineness of 1 decitex or less**, equivalent to **1 gram per 10 km of yarn**.

It is obtained from synthetic yarns such as polyester, polyamide, viscose or polypropylene, whose fibers are divided into **countless filaments a hundred times thinner than a hair**. The very thin thickness allows the filaments to **reach into every porosity of the surface, removing even the smallest particle of dirt** with ease.

In addition, the incredible capillarity that characterizes the microfiber determines a significantly **higher absorbency than traditional yarns**, ensuring a wide floor covering.

The synthetic fibres used to make microfiber products develop a static charge by friction which **attracts and traps dust**.

A high percentage of **polyester** in the microfiber textiles increases its effectiveness: it **removes greasy dirt completely**, leaving the surface perfectly clean.

Ultra-microfiber: the evolution of the yarn

Ultra-microfiber offers the same advantages as microfiber but differs in the **extremely thin size of the yarn** which is greatly reduced in thickness.

The incredibly small size exponentially **multiplies the points of contact** of the textile with the surface, ensuring truly **unrivaled cleanliness**.

LOW
ENVIRONMENTAL
IMPACT

Fighting viruses with Filmop microfibers

Cleaning is a **key point in preventing the spread of viruses**, so the equipment used must be up to the delicate task it is called upon to perform. For this reason, Filmop decided to arrange for an external microbiology laboratory to test the viral removal capacity of different types of mops.

Microfibers for floors **Rapido, Rapido Super Extra, A-B Plus, Micro-Activa, Wash Basic and Active-Fur**, disposable microfiber **Mono-Tex** and microfiber for surfaces **Eco Multi-T** have **passed with flying colors the rigorous test** carried out by the independent laboratory: the analysis revealed efficacy in viral removal by all tested textiles moistened with only sterile water before their use. In particular, the test showed a **removal of Human Coronavirus 229E from steel surfaces by up to 99.9%**, establishing the undoubted ability of Filmop microfibers to effectively fight the spread of viruses.

Filmop yarns

Natural highly absorbing fiber that keeps dirt, releasing it only during the washing of the mop. Ideal for all inside floors with a medium degree of dirt.

COTON

70% Cotton - 30% Polyester

The combination of cotton, a natural fiber with a high absorbing level, and polyester, a synthetic fiber very strong and resistant to washings, guarantees a perfect running of the mop on the floor. Ideal for all inside floors with a medium degree of dirt.

POLYESTER-COTTON

70% Polyester - 30% Cotton

Microfiber is a synthetic fiber which penetrates deep into the grooves and pores of floors, absorbing the removed dirt and retaining it till mop washing. Ideal for dusting and washing industrial floors, natural stone, single-fired tiles and stoneware with medium to high dirt degree.

RAPIDO

80% Microfiber (100% Polyester) + 20% Polyamide

Microfiber provides deeper cleaning, greater efficiency and gliding thanks to its fibers that penetrate more easily into the microporosity of the floor. Ideal for washing any type of interior floor with medium to high dirt degree.

RAPIDO SUPER

100% Microfiber (80% Polyester - 20% Polyamide)

High-performance **microfiber** designed to assure deep cleaning and high glide even on porous surfaces. Ideal for washing industrial floors, natural stone, single-fired tiles and stoneware with medium to high dirt degree.

RAPIDO SUPER EXTRA

100% Microfiber (80% Polyester - 20% Polyamide)

Microfiber with high cleaning power and high absorbency that guarantees an excellent cleaning result, even with intense dirt. Ideal for washing any type of floor, both continuous and tiled with joints, with a medium-high degree of dirt.

TWIST-TUFT

100% Microfiber (80% Polyester - 20% Polyamide)

Microfiber better releases the micro-particles of dirt, cotton improves the absorbing capacity of the mop, covering more washable square meter, while polyester allows an easier running of the mop on the floors. Ideal for all inside floors with a medium-high degree of dirt.

TRIPLO

70% Polyester - 30% Cotton

The **ultra-microfiber AB-Plus**, thanks to the special antibacterial treatment with silver ions, is ideal to avoid the proliferation of bacteria and cross-contamination. It eliminates up to 99.98% of bacteria and inhibits their growth thanks to the electrostatic action. Ideal for washing hospital interior floors with a medium degree of dirt.

ANTIBACTERIAL ULTRA-MICROFIBER

75% Ultra-Microfiber (80% Polyester - 20% Polyamide) + 25% Polyester

DOSING HANDLES

Ultra-microfiber characterized by high absorbency and excellent glide, requires little mechanical friction on the floor and cleans effectively and deeply. Ideal for frequent washing of industrial, single-fired, stoneware and wood floors with a medium degree of dirt.

MICRO-ACTIVA

75% Ultra-Microfiber (80% Polyester - 20% Polyamide) + 25% Polyester

Ultra-microfiber with polypropylene inserts that allow the removal of the most difficult dirt while offering excellent glide. Ideal for scrubbing and washing non-slip floors and natural terracotta with a medium degree of dirt, characterized by stubborn dirt.

PULI-SCRUB

70% Ultra-Microfiber (71% Polyester - 29% Polyamide) + 30% Polypropylene

Ultra-microfiber with polypropylene inserts that allow the removal of the most difficult dirt while offering excellent glide. It is characterized by its high absorbent power. Ideal for scrubbing and washing non-slip floors and natural terracotta with medium to high level of dirt, characterized by stubborn dirt.

PULI-SCRUB PLUS

70% Ultra-Microfiber (71% Polyester - 29% Polyamide) + 30% Polypropylene

It provides excellent glide and fast, effective cleaning due to its special **ultra-microfiber** and polypropylene composition. Ideal for scrubbing and washing non-slip floors and natural terracotta with a high level of dirt, characterized by stubborn dirt.

PULI-BRUSH

50% Ultra-Mikrofaser (80% Polyester - 20% Polyamid) + 50% Polypropylen

Thanks to the small size of the yarn and the high electrostatic power, the **microfiber** has a mechanical action on the molecules of dirt removing them and trapping them between the fibers. Ideal for spray cleaning and dusting on any kind of floor with medium degree of dirt.

SMART-FUR

100% Polyester Microfiber

Microfiber with nylon inserts for a lower mop friction and a better dirt collection. Ideal for light scrubbing and washing of industrial, single-fired, stoneware and wood floors with a medium degree of dirt.

ACTIVE-FUR

85% Microfibr (100% Poliestere) + 15% Poliammide

Microfibre with stripes, whose composition offers a perfect balance between cleaning power and mop friction. Ideal for washing industrial, single-fired and stoneware floors with low dirt degree.

SKILL-FUR

60% Microfiber (100% Polyester) + 40% Polyester

For perfect textile care, a washing temperature of 60°C, maximum 95°C, is recommended.

Please, refer to pages 28-29 for washing instructions.

DOSING HANDLES

Filmop is the first Italian company designing and producing an innovative floor flat mopping system, overcoming the traditional ones employing string mops. Filmop has conceived a new mopping system based on a flat plastic mop holder, named **Speedy Mop holder**[®], to increase the size of the cleaning tool mopping the floor with important advantages in terms of time and collection of dirt. Moreover, Speedy mop holders are foldable allowing to wring the mop without dropping it from the mop holder.

All Filmop mop holders can be equipped with **Lock System** joint

Spin the mop holder and let it drop onto the floor to open it

Unlocked joint: floor mopping

Locked joint: cleaning of walls and ceilings

DOSING HANDLES

As regards the **disinfection with pocket mop system**, Filmop proposes a range of plastic foldable mop holders, including **Click Safe** mop holder.

With Click Safe, combined with the special bucket with cover, there is no need to touch the mop used to release it, therefore preventing hands from turning into vehicles for bacteria and viruses.

The used mop is collected directly into the bag, so the operator does not have to continually bend over to pick it up from the floor.

Click Safe also allows the mop to be attached to the mop holder without effort or hand contact, preventing cross-contamination.

The mop holder is designed to be used with the full range of 40 cm mops with pockets and the Mono-Tex disposable mop, which is ideal for maintaining a high standard of hygiene.

All Filmop mop holders can be equipped with **Lock System** joint

PATENTED SYSTEM

HOW TO USE IT

HOW TO REMOVE THE MOP

Fix the mop to the mop holder.

Start mopping the floor.

Insert the mop holder into the bucket with cover.

Pull up the mop holder to release the mop.

FLOOR CLEANING

Disinfection with strap tape system can be used with all mops with backing with strap tape system, combined with the specific plastic or aluminum mop holder.

Lightweight and resistant, the mop holders feature a trapezoidal shape that makes it easy to clean even hard-to-reach areas and flat edges that ensure excellent adherence to the floor.

The strap tape system offers important advantages: optimal cleaning of floors, walls, and baseboards, less strain, and cost savings due to the possibility of changing profiles without the need to replace the entire tool.

All Filmop mop holders can be equipped with **Lock System** joint

HOW TO USE IT

Fix the mop to the mop holder directly into the TOP-DOWN® bucket.

Start mopping and disinfecting the floor.

HOW TO REMOVE THE MOP

Hold mop ends with both feet and pull up the mop holder to remove the mop.

Drop the mop into the provided collection bag.

Unlocked joint: floor mopping

Locked joint: cleaning of walls and ceilings

Boundless cleaning all-in-one

Filmop has developed a cleaning system that goes beyond the geographic boundaries and habits in the cleaning world: **Globo** is the first and only **universal wet mopping system** that can be used as any traditional system, obtaining superior results in terms of performance, hygiene and ergonomics.

It adapts to the needs of operators who can continue to work using their preferred method (strap tape system, pockets, pockets-flaps) with the advantage to work with a single **more ergonomic, hygienic and practical** system.

Globo system, composed of one **foldable mop holder** and one **mop with micro flaps**, has been designed to **make cleaning operations easier assuring the highest hygiene**:

- **It makes the mop fixing and release operations quicker and easier**, obtaining a cleaning process optimization, a considerable working time reduction and less efforts in comparison with traditional cleaning systems.
- **100% touch-free system: touchless** fixing and release of the mop from the mop holder, thus **reducing the cross contamination risk**.
- **It prevents fatigue**: the operator always works in conditions of maximum ergonomics; this system allows indeed to avoid continuous bending and a wrong posture during the cleaning operations.
- It can be used with any wet mopping system: **soaking on demand, pre-soaking or traditional wringing system**, ensuring high performances.

Turn and double the face of clean!

Duo Face is the innovating combined system (mop holder + mops) designed by Filmop to simplify and optimize the cleaning of floors and vertical surfaces.

The **reversible mop holder** and the **range of double-faced mops** allow to **double the efficiency** of the cleaning operations with one single system.

PATENTED SYSTEM

Reversible mop holder

- Make full use of the double mop holder thanks to its two perfectly flat and reversible sides
- Fix the mop to the mop holder with 2 simple clicks: the special raised central part allows to insert the mop in the right position, its serrated external borders assure a stable and non-slip mop fixing
- Avoid any contact of the mop with your hands thanks to its foot-operated pedal devices
- Clean also the vertical surfaces very easily thanks to the Lock System technology
- Do not waste your strength: the central joint distributes the pressure uniformly onto the whole surface of the mop holder

Double-faced mops

The two mop sides are made of 100% cleaning surface and matched together thanks to a special ultrasonic welding that makes seamless Duo Face mops **much more resistant and more hygienic**, as they have no pockets or extra material where dirt and bacteria would hide and grow.

Duo Face mops are **perfectly reversible**:

- **Turn the mop and double the square meters of surface:** use the first side of the mop, turn it and go on with the second side. 1 traditional mop cleans about 25 sqm, 1 Duo Face mop: 50 sqm.
- **Turn the mop and double the possible cleaning operations:** wash, turn and dry! Duo Face BARRIER mops are made with a special **waterproof barrier** inside that separates the two cleaning sides of the mop. Dry and wet finally together in one single mop.

Duo Face ultra-microfibers

Duo Face mops are the outcome of a long and **careful planning** that has involved Filmop R&D department for a long time to reach the best final result: a wide range of double-faced mops to satisfy several and different cleaning needs, manufactured with **completely Made in Italy** and **high quality microfiber** material.

Duo Face microfibers guarantee the maximum performance concerning **collection of dirt, release of dirt** during washing, **mop running, quality** of final cleaning results, **durability and mop lifetime**.

FLOOR CLEANING

Unilav is a wet mopping and/or disinfection tool for medium small areas, such as stairs, offices, bars, small shops with a medium degree of dirt. It is very useful for quick actions. In combination with microfiber cloths or with disposable cloths, it guarantees excellent cleaning results. Very simple and quick to use, light, handy and ergonomic.

Two types of refilling bottle: 650 ml and 1000 ml in different colours: red, blue, green and yellow.

The side-grip allows to regulate the release of cleaning solution: continuous flow or intermittent flow.

In order to have a complete disinfection system, Filmop offers also a **Unilav kit** that allows the operator to carry all the necessary equipment during the cleaning operations, optimizing working time.

Sanety tool is equipped with a special pierced "flowthrough" plate that allows a uniform distribution of the cleaning solution on the floor, thus avoiding waste of product.

HOW TO PREPARE IT

HOW TO USE IT

Lift up the plastic cover and fix it to the handle grip.

Fill in the tank.

Press and release the knob at the top of the grip for an intermittent wax flowing; press and block the knob for a continuous wax flowing.

The rubber cover on the knob on the handle grip avoids dirt and bacteria inside the hole and guarantees a more stable leaning of the tool against the walls.

Simple, quick and efficient cleaning

DROP

Drop is a **professional floor cleaning system** complete with tank handle with 500 ml capacity, aluminium mop holder and Skill-Fur microfibre mop.

Light, handy and easy to use, particularly advised for the cleaning in **medium-small environments** and in all those situations where a **fast and quick action** is required.

This system is characterized by a **well-finished, treated in detail design** for the highest practicality, speed and safety:

- **Intuitive, light and handy**, it reduces the operator's efforts and working time
- It allows to **dose the detergent solution** according to the surface and the degree of dirt
- **No spillage of cleaning solution** thanks to double safety lock acting on button and tank
- Its compact size allows to **clean easily also the hard-to reach areas**
- The reduced overall dimensions help to **store it easily even in the smallest closets** at the end of the cleaning operations

PATENTED SYSTEM

360°

360°

ERGOSWING JOINT

YouTube

Drop

ErgoDrop

ERGODROP

ErgoDrop combines the advantages of the professional Drop system with those of the innovative ergonomic ErgoSwing system, ensuring **maximum results with minimum effort**.

ErgoDrop is designed to **prevent the onset of professional illnesses**: the 360° rotation of the grips and the ergonomic design of the mop holder joint guarantee the health and well-being of the operator.

- **It doesn't force the operator to assume uncomfortable or asymmetrical positions**: it makes the S-movement easier, ensuring a correct posture during the cleaning operations.
- **It doesn't oblige the operator to make extreme wrist movements**: it reduces remarkably wrist flexion and extension movements compared to traditional systems, preventing fatigue.

Mop soaking systems

Mop soaking on demand and pre-soaking system

MOP SOAKING ON DEMAND AND PRE-SOAKING SYSTEM

WHY CHOOSE A MOP SOAKING SYSTEM?

Advantages:

- **Reduced risks of bacterial cross-contamination:** always clean detergent solution and use of one mop for each room
- **Environmentally friendly:** higher control of chemical solution with reduced chemical and water waste, lower environmental impact if compared with traditional mopping systems employing bucket and mop
- **Better ergonomics:** no rinsing and wringing; consequently, less effort for the operator and reduced costs for industrial accidents and illness leaves
- **Easy to use:** user-friendly, systems that make it easier to train the staff
- **Reduced costs for cleaning:** reduced working hours guarantee reduced labour costs
- **Excellent results in cleaning and hygiene:** thanks to the combination of mop soaking system and microfiber

MOP SOAKING SYSTEMS

Mop soaking system on demand:

Single mop soaking on demand directly on the trolley by means of the specific Equodose dosing station.

EQUODOSE system

Pre-soaking system:

Mop soaking system in advance, preparing the mops before use, normally in specific places, employing hermetic **Top-Down®** buckets or **plastic drawers**.

TOP-DOWN® system

System with drawers

COMPATIBILITY

Filmop mop soaking systems fit:

Strap tape system

Vega Top-Down®

Arka Top-Down®

Morgan Top-Down®

Alpha

EQUODOSE®

Equodose is the innovating **mechanical dosing device** developed by Filmop to make the **mop soaking on demand** directly on site.

This system is designed with an **adjustable dosing mechanism** according to the features of the mops to use and the surfaces to clean.

YouTube

Advantages:

- **Prompt and ready in the working place:** mop soaking on demand and directly on site, just the necessary mops, even one single mop!
- **Minimum overall dimensions:** ideal in environments where there is a lack of big spaces to prepare and stock the pre-soaked mops and the hermetic buckets.
- **Eco-friendly product, low environmental impact:** water and detergent saving, as this system allows to soak only the necessary mops, eliminating any unnecessary washing of unused reserve mops in the washing machine. No need of electric power, no need of power supply, made of 100% recyclable plastic.
- **Easy to use:** just a few and simple steps and the mops are ready to use, high intuitive system.
- **Flexible:** you can regulate very accurately the right solution for each single mop according to the features of the surface to clean, the degree of dirt and the absorbing capacity of the mop.
- **High standards of hygiene:** reduction of cross-contamination risks, making easy and simple to clean each room with a different and ever clean mop. Tanks preserve active principles of some chemical solutions that could become less effective over time: this system is ideal for hospitals and healthcare facilities.

Features:

- **Totally mechanical and without electrical parts:** dosage is regulated by means of a graduated dial and operated thanks to a hand lever.
- **Strong and easy to maintain:** made of high quality polypropylene (Made in Italy), easy and low maintenance is required.
- **Safe and as by law enacted:** the graduated dial and tank can be blocked with the specific safety key device to avoid any tampering or improper use; hand level with push button to block the solution dispensing mechanism.
- **Modular design:** available with 1 or 2 tanks to increase the dosing system autonomy or to operate with two different detergents/ cleaning solutions at the same time.
- **Versatile:** fitting Alpha line of trolleys. Suitable for several kinds of mops and mop holders: strap tape system, pocket mop system, Globo system and Duo Face mop system (only fitting 40 cm mop systems).

MOP SOAKING ON DEMAND AND PRE-SOAKING SYSTEM

Dosing system

Increased flexibility: the 50 ml to 350 ml adjustable system ensures better detergent solution dosing precision also for the lightest cloths, such as surface mops for hand use, further reducing waste

MOP SOAKING SYSTEMS

Sealed reservoir

More effective: hermetic tank thanks to the internal washer of the cap, better preservation of the cleaning solution

Higher safety: the cap locking system improves the safety level

Better hygiene: the reservoir design facilitates easy cleaning and good long-term maintenance

Rotate the graduated dial from 50 ml to 350 ml to choose the right dose of solution. If necessary, remove the safety key to lock the dial and keep the right dosage.

Push the mechanical hand lever completely down.

Take a clean mop and lay it in the tray ready for soaking with the cleaning side downwards.
Wait for a few seconds for a complete and uniform mop soaking. This system is suitable for several kinds of mops, but only for 40 cm mop sizes.

MOP SOAKING ON DEMAND AND PRE-SOAKING SYSTEM

Click Safe: guaranteed hygiene, health protection

Click Safe is a **touchless cleaning system** consisting of folding mop holder and bucket with cover that can be combined with the mesh bag, designed to make operations easier, more hygienic and safer.

The mop holder hooks the mop easily and immediately while the cover instantly releases it directly into the bucket, the operator does not need to touch it with the hands and bend over.

plastic
second life
MIX ECO

The special bag completes the job: placed in the bucket, it collects used mops making emptying and handling of laundry operations even faster and more hygienic.

Combining Click Safe with **soaking systems** helps to maintain a high level of hygiene throughout the cleaning procedure, lowering the risk of cross-contamination.

The **Equodose** mechanical dispenser for soaking on demand and **Top-Down** hermetic buckets for pre-soaking allow each area to be cleaned with a different mop or cloth while the touchless system allows them to be disposed of effectively preventing the spread of bacteria and viruses.

Uni-Connect connects **instantly and safely** all equipment required for cleaning of environments.

Univesal connection:
the end cone allows the same handle to be attached to any cleaning tool

Quick hooking:
attaching takes place instantly, without any complicated procedures

Safe fixing:
the equipment remains securely attached during cleaning operations

Do you need to optimise the equipment on the trolley?

Equipping OneFred and Alpha trolleys with the special connections gives you everything you need for thorough cleaning, minimising the size of the trolley.

NEW Effective glass cleaning

Window washers stand out for their **excellent collection power and high absorbency**. Made with **long, short or short yarn with bristles**, they perform considerably better than traditional sponges. The three versions are also available with an **abrasive fibre side**, ideal for **removing the most difficult dirt** from glass without scratching it.

SHINE
Unveiling the true beauty of glass

Compatible with Uni-Connect system and Italian thread

The high absorbency of the window washer sleeves results in **considerable water savings**

The window washer sleeves act together with their **supports, conceived for effectiveness and efficiency**:

CLARUS-W PRIME

It gradually releases the cleaning solution while washing the glass, ensuring **long-term soaking**.

Jointed CLARUS-W MASTER

Besides the advantages of the fixed version, it provides a **rotation angle of up to 180°** that can be **freely locked** in any position.

CLARUS-W MASTER

It has full surface adherence, making **dirt removal faster and more effective**.

GLOSS-W AMBO

It **combines** the strengths of the plastic squeegee with those of the fixed aluminium support **in a single tool**.

Brilliant window cleaning system is the ideal solution for the cleaning of vertical smooth surfaces like interior window cleaning, mirrors, stainless steel surfaces, lacquered surfaces, painted doors, etc.

- **Fast:** the light and handy mop holder and the ultra-microfiber mop combined with a specific alcoholic-based detergent for surfaces, guarantee shining surfaces with just one wipe
- **High performance:** thanks to its excellent features, the specific ultra-microfiber mop removes fingerprints, smears, dust particles and dirt with excellent cleaning results
- **Efficient:** the use of a flat mop holder guarantees a considerable working time reduction in comparison with traditional hand cleaning systems and a perfect adherence of the mop holder to the surface
- **Ergonomic:** a handy and ergonomic cleaning system both with mop holder with hand grip and with mop holder combined with telescopic handle to safely reach also the highest areas

SNAKE: shapeable hand duster

Designed with a much more flexible and stronger plastic support, Snake can be used on both irregular and rounded surfaces for high-quality and more effective performances.

The hand duster is available also in the version equipped with **cloth fixing star-clips** to fix the disposable cloths and with a **practical push button** in the joint that allows to bend the hand duster support very quickly.

Shapeable to clean both irregular and rounded surfaces

Removing the cap from the handgrip, the dusters can be used with handles with thread, poles with Uni-Connect cone \varnothing 21 mm and telescopic handles with Uni-Connect cone \varnothing 23 mm

YouTube

Flatty: the hand duster that makes cleaning easier

The innovating **Flatty** hand duster is ideal to clean all surfaces thanks to its ultra flexibility.

PATENTED SYSTEM

- **Designed to be used with multipurpose cloths** for the cleaning of surfaces, till now used only by hand.
- **The cloths are rolled up on the hand duster support** and can be fixed thanks to the specific fixing clips.
- **The width of the hand duster** allows a quick and efficient dusting operation in a few simple steps.

Wrap the cloth and fix it thanks to the **four clips**

Turn **360°** to clean a bigger surface

Push the button and **bend to 270°** to clean even the hard-to-reach areas

TOP-CLEAN SYSTEM

Each surface has specific qualities and features that could be irreparably damaged, if cleaned with unsuitable cloths.

This is the reason why Filmop has designed and carried out its **TOUCH** line of cloths and sponges: top quality products for the cleaning of environments, from the floor to the most delicate surfaces, that ensure the best results in the shortest time and with the minimum effort.

TOUCH products are divided according to their cleaning features, differing between **Multipurpose** and **Specials**.

The special range includes **EU Ecolabel certified cloths**, a guarantee of sustainability throughout the entire life cycle.

Touch

Multipurpose

Cloths to use dry for a quick and daily cleaning; if damped with water or detergents, they are advised for a deeper and more professional dusting.

Specials

Cloths meant for specific cleaning operations, they clean effectively without leaving marks and help the quick drying of surfaces if used wet.

Washing temperatures:

: Multi-T, Multi-T Maxi, Multi-T Light, Dual-T, Silky-T, Multi-T antibatterico, Steel-T, Power-T, Glazy-T, Eco Multi-T

: Free-T, Slide-T, Cristal-T, Glass-T, Basic-T, Fast-T, Profi-T

COLOR CODE

The colour of cloths represents a shared colour-coding that identifies the area to be cleaned and how to be used, avoiding the transmission of dirt and bacteria from one cleaned surface to another one, reducing any risk of cross-contamination.

Red cloth: very high risk
For the cleaning of bidets, WC

Yellow cloth: high risk
Cleaning of washbasins, tiles and mirrors in bathrooms

Green cloth: medium risk
Cleaning in kitchens, canteens and bars

Blue cloth: low risk
For the cleaning of all surfaces, such as tables, writing desks, wardrobes, glasses

Power-T: multipurpose cloths, ideal for any surface

The Power-T cloth quickly cleans **any kind of surface**: made of non woven ultra-microfiber, **exerts a degreasing and polishing action**.

Resistant and long lasting, ideal for **dry and wet dust mopping**.

- BRIGHT CLEAN
- HIGH ABSORBENCY
- BEST SLIDING
- LONG LASTING PERFORMANCE

Glazy-T: special cloth for glass and windows

The Glazy-T cloth is the ideal solution for **glass and windows**: made of non woven ultra-microfiber, **it ensures an effective cleaning and leaves no streaks**.

It offers high performances both in **wet and dry use and excellent resistance to washing**.

Mono-Roll disposable cloth

Mono-Roll is a **disposable TNT cloth with perforated weave** characterized by its high absorbency capacity and a uniform release of the cleaning solution on the surface.

- Removes and traps dirt
- Suitable for use with disinfectants
- Excellent also for dry cleaning
- Manual use or combined with dusting mop holders for high surfaces

PATENTED SYSTEM

The roll can be soaked in a **plastic bucket 4L**, following a few simple steps.

- Hermetic cover with an exclusive and fast cloth extraction system
- Practical and handy, it can be used alone or with Alpha trolleys

■ Mono-Roll

Surface cleaning with pre-soaking system

Top-Clean is a cleaning system especially advised for the cleaning of desks, table-tops, tables, blackboards and walls in classrooms, schools, canteens, self-services, bars, restaurants and hotels.

This mop holder combined with a traditional mop covers a wider working area than the one covered by the operator's hand using a simple cloth, thus saving time during cleaning operations; it is ergonomic and handy thanks to its grip.

WARNING SAFETY SIGNS

ErgoSwing ergonomic system

HIGH PERFORMANCES, NO EFFORT

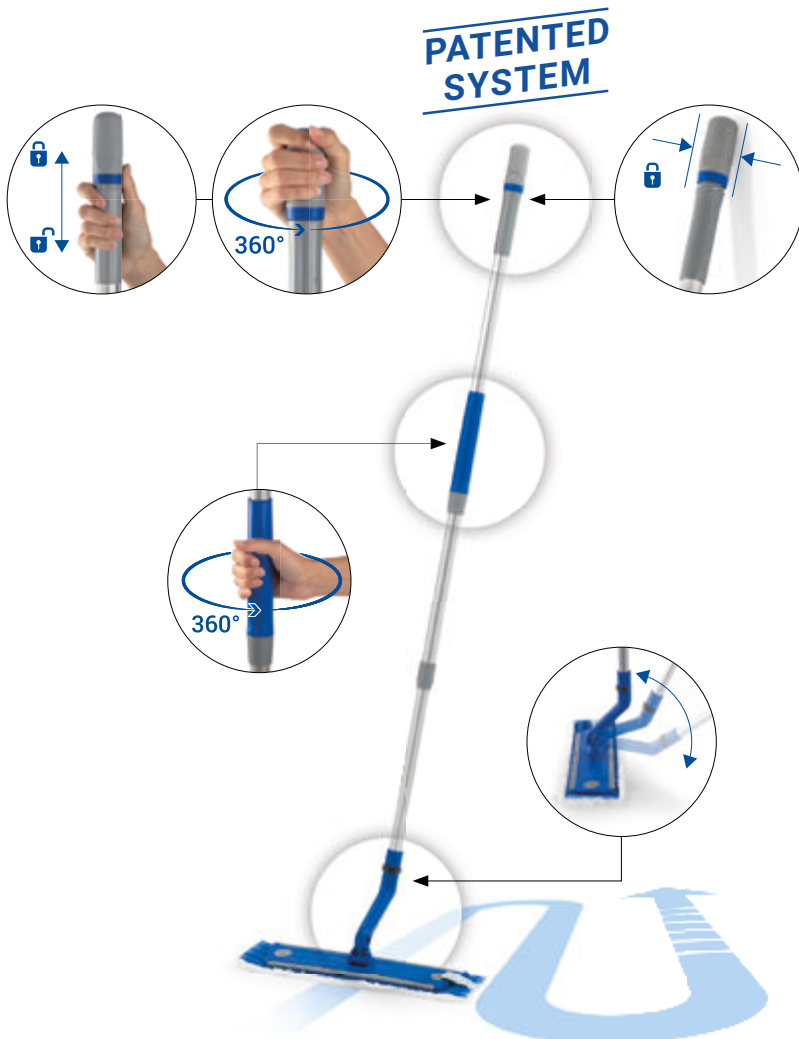

ErgoSwing is the innovative system consisting of telescopic handle with turning grip and mop holder with ergonomic joint designed for **easy S movement**.

The system guarantees **less strain** and **increased productivity**, together with better floor cleaning performance.

- **ERGONOMIC:** 360° rotation hand grips for easier movement and sturdy grip
- **SAFE:** the rotation locking mechanism allows to safely place the tool
- **EFFICIENT:** the system offers optimum performance, with significantly less effort required by the operator
- **INTUITIVE:** it features a simple and clear design that makes it particularly easy to use
- **COMFORTABLE:** comfortable and pleasant to use, it ensures the psycho-physical well-being of the operator
- **TELESCOPIC:** the adjustment of the length of the telescopic handle up to the chin helps a correct posture during cleaning operations.

HANDLES AND SAFETY SIGNS

The rotation mechanism of the upper handle can be locked in order to place the tool safely.

ErgoSwing easily cleans even the most difficult to reach places.

HANDLES

WARNING SAFETY SIGNS

CORRECT POSTURE

Continuous improper posture is one of the main risk factors in the appearance of disorders and pathologies affecting the musculoskeletal system over time.

ErgoSwing is designed to **ensure the maintenance of correct posture** while cleaning floors:

- the neck and the trunk remain in a symmetrical position
- the arms do not assume uncomfortable positions
- the shoulders are not forced to elevate
- the elbows are not subjected to extreme flexing or extension
- the forearms are not required to rotate in an extreme manner
- the knees and ankles remain in a neutral position

EFFORTLESS

The use analysis found that **the effort made by operators while using ErgoSwing is significantly lower** than that of standard systems.

The notable reduction in effort leads to less fatigue and an increase in operator well-being, resulting in **higher productivity**.

PROVEN ERGONOMICS

In the long term, repeated wrist strain can cause muscle-skeletal issues and pathologies. The ErgoSwing system use analysis conducted by Humana Consulting demonstrates a **significant reduction in wrist bending and extension** when compared with traditional systems: ErgoSwing allows the user to significantly remain below the maximum tolerance area (45°), **preventing the onset of work-related illnesses**.

WRIST MOVEMENT WITH THE ERGOSWING

ErgoSwing limits wrist movement, thus **reducing effort**

WRIST MOVEMENT WITH STANDARD SYSTEMS

Standard systems force the wrist to fully extend

Drop: tank handle

Thanks to Drop floor wet mopping is **easy**, **quick** and **efficient**:

- **Cleans** and **sanitises** every surface **in an instant**
- Lightweight, handy and **easy to use**
- **Prevents spillage** of cleaning solution

PATENTED SYSTEM

SMART DESIGN

Its tank has a 500 ml capacity and can be easily filled by means of a specific jug

The practical flap with rubber gasket assures an airtight seal

The ring, with a patent pending closing system of the tank, prevents from accidental spillage

The dispensing of the cleaning solution is activated by means of the button, which can be locked manually to prevent spillage

The three nozzles allow the cleaning solution to exit directly onto the surface to clean

It is possible to clean easily also the most difficult to reach areas thanks to its compact size

ErgoDrop: ergonomic tank handle

ErgoDrop combines the advantages of the professional Drop system with those of the innovative ergonomic ErgoSwing system, ensuring **maximum results with minimum effort**.

- Designed to **safeguard the operator's health**
- **It makes cleaning easier**, considerably reducing efforts
- **It assures high performances** and increases productivity

Functional and affordable

Twice is the double bucket with wringer for professional floor wet mopping, designed to guarantee the best service and profitability during cleaning operations. It has a total 30 L capacity and it is equipped **with two drain-plugs**; thanks to its two compartments, it separates clean solution from rinsing water.

The bucket can be piled up thanks to the plastic feet that can be easily unassembled saving transport and storing costs.

It fits all Filmop plastic wringers.

Two separate drain-plugs

BUCKETS AND MOP TROLLEYS

Duo Pro System: double cleaning in half the time

Duo Pro System is a **professional wet mopping system** composed of a practical bucket with squeezing sieve, available with or without wheels according to the specific needs.

Designed for its use with the **Duo Face reversible mop holder** and **the range of double-faced mops**, it assures the highest efficiency and significant energy, time and cost savings.

- **It reduces strain:** designed to guarantee the highest ergonomics, comfort and simple use
- **It saves time:** thanks to the combined efficiency of mop holder, mop and wringer, the system ensures **double cleaning** with **half the wringing** when compared with traditional systems
- **It reduces waste:** the high level of washing autonomy of microfibre allows to use **significantly less detergent**, therefore also decreasing the impact on the environment

Suitable also as washing system combined with the Alpha trolley line

The reversible mop holder and the double-faced mops make cleaning easier: find out more in the Duo Face system section

How to use it

Soak the mop in the cleaning solution

Insert the mop into the wringer

Lower the lever

Start mopping the floor

Rinse the mop

Cleaning becomes easy

Easy Wash is a **compact and handy semi-professional system** designed to make cleaning extremely easy, convenient and fast thanks to the innovative design studied in every detail.

Composed of a touch-free mop holder, microfiber mop and bucket with wringer, it is particularly suitable for washing **horizontal and vertical surfaces** in small areas.

TOUCH FREE

PATENTED
SYSTEM

Easy WASH

YouTube

HIGH PERFORMANCE CLEANING MOP HOLDER AND MOP

- The exclusive **touch-free system** eliminates any hand contact with dirt, preventing the risk of cross-contamination
- The **mop fixing and release system** makes operations quicker and easier, avoiding repeated bending and consequent strain
- The special **micro flaps** are designed to keep the mop fixed to the mop holder, thus preventing accidental release during use
- The **Energy-Fur microfiber** is characterized by its high capillary absorbency, which ensures a great floor coverage and effectiveness in removing dirt

ERGONOMIC WRINGING BUCKET AND WRINGER

- The special **shape of the wringer** facilitates mop wringing
- Built-in **handle holder** allows you to conveniently attach the tool
- The practical **back handle** makes it easy to grip the bucket when emptying
- **Polypropylene** composition ensures high durability and long service life

BUCKETS AND MOP TROLLEYS

Tradition to design innovation

OneFred is an **innovative and compact wet mopping system**:

- Modern design, conceived for maximum ergonomics
- Designed to be light, compact and resistant at the same time
- It assures the maximum versatility: one frame for buckets 15L and 25L, simple and quick to assemble
- With innovative, handy and safe coupling system on Alpha trolleys

Compatible with Uni-Connect system

OneFred combined with **Boost** wringer is specifically for flat mopping systems

Commitment towards environmental sustainability

Filmop is certified with the **Carbon Footprint Systematic Approach**, carried out in accordance with UNI EN ISO 14067:2018, which allows quantifying the environmental impact of the product expressed in CO₂ emitted at each stage of the life cycle.

OneFred trolleys are partly made of plastic components certified **Plastic Second Life** according to the Green Public Procurements environmental policies.

Arka trolleys are built starting from the double plastic frame used for the Fred trolley, assembling all the available snap-in components very easily and quickly and above all **without using any screw**.
Arka is the most compact among Filmop multipurpose trolleys: even in the smallest places the operator has a complete professional cleaning system at his disposal.
Since 2013, they have been made partially with **"Second Life Plastic"** certified plastic components, in accordance with the environmental policies set out for Green Purchasing in the public administration.

Optimal, efficient and ergonomic wringing

PATENTED SYSTEM

Boost optimises wringing, reducing drastically the efforts: the unique flat wringer **wrings 20% more with half the effort** compared to traditional wringers, minimizing cleaning time and costs while protecting the health and well-being of the operator.

+20% WRINGING

YouTube

Boost

The deep and uniform pressure applied by the plate on the flat mop ensures **a complete wringing** and a **uniform distribution of the cleaning solution** on the surface to clean, ensuring the best result in terms of cleaning and hygiene.

Performance is steady over time: Boost allows you to **always get the desired result** in terms of wringing and soaking of the flat mop, whatever the pressure applied to the handle.

HALF EFFORT

Boost **prevents the onset of occupational diseases over time**: the wringer makes the effort and the operator simply has to push the handle to the end of the stroke.

Unlike traditional wringers that force the operator to repeat the operation several times to achieve the desired result with Boost **it is sufficient to lower the handle just 1 time to obtain the ideal wringing.**

100% VERSATILE

Boost meets different wringing needs: it is characterized by an innovative **adjustment system that allows to optimize the level of wringing** according to the degree of humidity you want to obtain and the type of flat mop in use.

TWICE

Specially designed to be used with **flat mopping systems**, it can be matched to any **Filmop trolley** line and to the special range of **wringer buckets**.

COLLECTION AND STORAGE 186

WASHING 188

SOAKING 193

METAL FREE 197

Alpha is a complete range of **tailor-made multipurpose trolleys**, designed to **satisfy any cleaning need** thanks to the modularity of their components that can be combined with many accessories.

The available configurations are endless, from the most compact to the most complete version to satisfy any request in the best possible way.

Each trolley can be freely customized, having everything you need for a complete cleaning always at your fingertips.

Alpha trolleys are partly made of **plastic components certified "Plastic Second Life"**: an important choice that confirms the engagement to look for eco friendly solutions meant to **reduce the environmental impact** of the products, without giving up the **high quality standards**.

MORGAN

CHROMED AND RILSAN COATED TROLLEYS

A CUSTOMISED TROLLEY

The modularity characterizing the complete range and the wide assortment of accessories allow to **customize each part of the trolley** according to the specific needs and requirements.

The Alpha trolley line is characterized by an **extraordinary attention to details**, not only from the design point of view, but also from the aesthetic point of view.

Visually pleasing working tools can make the difference: thanks to their well-finished design and modern style Alpha trolleys are an **elegant solution to improve the offered standard service**.

Elegant trolleys thanks to their smooth lines and rounded edges **fitting any environment with their sobriety and simplicity**.

There is a **huge variety of customization possibilities**; discover all components and accessories at your disposal from page 198 onwards.

ALPHA

MORGAN

CHROMED AND RILSAN COATED TROLLEYS

Morgan multipurpose trolleys satisfy any cleaning request. Thanks to an intelligent combination of polypropylene and Rilsan coated components they are very strong and have a long life. Quick and easy assembling and versatility are the main features of these trolleys. They can be used both with the traditional wet mopping systems with buckets and wringer and with the more recent wet mopping system with pre-soaked mops.

Morgan trolleys have been produced with some components certified "Plastic Second Life", that is to say made of recycled plastic materials, according to the Green Public Procurements environmental policies.

A-B PLUS anti-bacterial system

A-B PLUS

A-B PLUS

Safe hygiene and health for everyone!

A-B Plus is a complete cleaning system whose components have been treated with anti-bacterial additives in order to slow down the growth of bacteria, molds and fungi.

This cleaning system uses silver ion technology for microfiber and Zinc Pyrithione for Alpha trolleys and their components.

The anti-bacterial additive, mixed during the production process, is part of the polymeric matrice and penetrates the cell wall of the micro-organism blocking its growth and reproduction functions.

The anti-bacterial treatment can be **guaranteed for the whole life cycle** of the product.

Better hygiene and safety for everyone

- For end users: patients, children, old people, consumers
- For professional people: doctors, nurses, teachers and food operators
- For cleaning operators
- For environment

A sanitization cleaning system for hospitals... and more than that

- Hospitals: both low-risk common areas and high-risk areas, such as operating rooms, infection disease wards, intensive care wards and similar environments
- Nursing homes
- Public facilities: schools, nursery schools, food industries, banks, airports, railway stations

Partially made with plastic components certified "Plastic Second Life"

**100%
recyclable**

Test carried out by EcamRicert Srl according to the ISO 22196:2011 method

Tested by SGS, according to ISO 20743-2013

Atlix: the waste collection that makes a difference

Atlix is a range of bins characterized by a modern, stylish and functional design, specifically conceived to make waste collection easier and more convenient.

Atlix Line

AtlixPress

Compliant with **H.A.C.C.P.** rules, avoids contact with hands thanks to the pedal. The cover can be **graphically customized** to turn the bin into a means of communication or to fit the environment.

50 lt

AtlixFlip

Equipped with an asymmetrical swing cover with **anti-shock opening** and **lock for easy operation**, color-coded available.

Available also in the **ATLAXFLIP ECO** version, with a high percentage of recycled plastic.

50 lt

25 lt

AtlixFit

Range of bins with shaped covers to **make sorting waste collection intuitive**.

The inserts are available in **color-code** to customize the collection of different types of waste, making handling easier.

PAPER HOLDERS

Sirius waste collection bins:

- **Environmentally friendly:** partly made of plastic components certified **Plastic Second Life** according to the **Green Public Procurements** environmental policies
- **Versatile:** available in the 60L, 30L, 2x30L, 2x15L, 30 + 2x15L and 15 + 2x8L versions for a better separate waste collection
- **Hygienic:** thanks to their round-shaped line
- **Ergonomic:** foot pedal opening cover; built-in pedal to avoid bin upsetting and reduce the overall dimensions of the bin
- **In compliance with HACCP rules:** it is the ideal bin for kitchens, restaurants, canteens and all the environments associated with food processing activities

Available in **white with colored cover** and in **white single color** version

The **Polaris Delux** bin 90 L is handy and can be placed everywhere; it is made **in compliance with the HACCP rules**: therefore, it is the ideal bin for kitchens, restaurants, canteens and all the environments associated with food processing activities. It is completely made of polypropylene, strong and round-shaped for an easy cleaning.

It can be equipped with shock absorbing pistons "Hush System" for a soft closing of the cover and with several accessories, such as a multipurpose plastic basket, a paper-roll holder and several different hooks to carry small cleaning tools.

It is equipped with an ergonomic push-bar and plastic wheels \varnothing 125 mm to handle the bin better and easier.

The cover has a 90° opening that helps the operator while emptying the bin.

The door has a 250° opening that allows to take out and empty the bag in a practical way reducing the operator's efforts.

Complete with shock absorbing pistons, two plastic hooks to fix the bag and with a cage for deodorant or disinfectant pills.

Delta: high capacity and space-saving size in just one trolley

Delta plastic bag holding trolley has a rounded and smooth design and is easy to clean.

It is equipped with a handy and ergonomic push-bar and a wide foot-operated pedal opening of the cover.

Maximum flexibility: available also in the version 2x60 L and 1x60L + 2x30 L for a much more efficient waste collection.

The bag holding trolley is now available in the **Delta Compact** version, ideal for the small and narrow spaces thanks to its space-saving size.

TROLLEYS FOR LAUNDRY
COLLECTION

SILVER

The **Morgan Hotel Elegance** line is elegant, smart, simple and fits any environment, satisfying any cleaning need and request in hotels. Characterized by Rilsan coated vertical frames, rich and elegant wooden shelves made of beech, brown plastified panels, easy to remove and periodically clean.

The trolley can be equipped with a wide and complete range of accessories ideal to meet any cleaning need: it can be used for the change of towels and linen, for the collection of dirty towels and linen by means of the specific trolleys for laundry collection, for the cleaning of rooms and bathrooms and for waste collection.

Light series

The housekeeping trolleys of the **Light series** are distinguished by their modern design, lightness and easy handling. The whole range also offers utmost capacity.

Some details about the Morgan Hotel Elegance line:

Plastic sliding drawer 10 and 22 L with locking key for guest amenities

Handy plastic baskets

System for the separate waste collection

Bathrobe holder kit

Supplied as standard with useful door stopper (Code P130001Q).

Morgan Hotel Trolleys can be used with several wet mopping systems:

Top-Down® system

Bucket 22 L and its special mop

Master Lux wet mopping system

Unilav wet mopping system

Accessories

Roll-up front covering: handy and safe

Coupling device to connect the laundry trolley with dirty linen to the Morgan Hotel trolley

Alpha Hotel: comfortable and functional service trolley

Alpha Hotel trolleys have a plain and simple design to fit any environment.

Partially made of PSV - Second Life Plastic - certified plastic components, they are available in open versions or with closing doors for maximum safety.

The Alpha Hotel range features utmost care of all details and a specific design conceived to ensure practicality, efficiency and functionality.

VERSATILE

- Can be configured according to your specific needs
- Customisable with components and accessories

MODERN DESIGN

- Smooth surfaces and attention to details
- Customisable with graphics, pictures and logo

HYGIENIC

- Smooth surfaces for easy cleaning
- Safety lock with universal key

SPACIOUS

- No waste of space
- Highest storage capacity

ERGONOMIC

- Lightweight and easy to move
- Designed to facilitate handling

Sliding tray with safety locking key

GREEN CERTIFICATIONS

- **Carbon Footprint** Systematic Approach
- **PSV** - Plastic Second Life
- **EU Ecolabel** for some Alpha models

Innovative closing mechanism to work safe

Better functionality

The models with two storage units have a left opening door, for **convenience** and **practicality**.

COLLECTION

SILVER

Organize your services and work better

The versions without central vertical frame ensure **high trolley capacity**, so that everything that may be needed for the job can be right at hand.

PATENTED SYSTEM

Versions without central vertical frame

Unhook the trolley and go

Thanks to **Link-Up, the new hook system** designed by Filmop, it will be possible to separate the bag holder compartment from the rest of the trolley with a simple click.

The **new independent waste collection unit** allows to move around more freely and comfortably during all waste or laundry disposal operations and to gain access easier to small and reduced areas, such as elevators, small hallways and laundries.

New baskets set for Alpha trolleys

The exclusive set of central trays for Alpha Hotel trolleys is an essential accessory to offer the **maximum convenience** and **safety**.

The practical set **doubles the storage capacity**, allowing you to further optimize your service trolley: it offers two open storage areas and two areas with **cover with locking key**, which can be organized according to your specific needs.

The set of central trays is characterized by a **well-finished design** in line with the **simple and elegant style** of the whole Alpha Hotel range of trolleys.

emotion

A new way to communicate through room service trolleys

YouTube

Emotion is Filmop line of trolleys for general and professional cleaning in hotels. Emotion trolleys are **handy, strong**, extremely modular and made of high quality polypropylene materials, from the base to the vertical frames, the shelves and all other accessories. Open or completely closed models are available to guarantee **the highest hygiene** and **the utmost security**. Moreover, thanks to their doors these trolleys always keep a clean and tidy look.

Next to their functionality, Emotion trolleys are characterized by their elegant, simple and pleasant design, enriched by a **new elegant graphics**.

Elegance and style match perfectly together with plainness and efficiency.

Thanks to its several components Emotion trolley can be fully accessorized and, consequently, it is ideal for any cleaning need; not only for the change of dirty clean linen, but also for room and bathroom cleaning, for waste collection and mini-bar refilling.

A very close and accurate research and planning have developed a line of trolleys that can be customized with images, special designs, pictures or brands, thus transforming, in a very completely original way, a simple service trolley into an advertising vehicle or into a trolley perfectly fitting the surrounding environment.

Some details about the Emotion line:

Base with 5 rubber wheels
Ø 125 mm to increase

Bag holder with bumpers.

Door with locking system
with removable key and with
ergonomic hand grip

Customizable design

KeepHotel: the trolley for hotels

KeepHotel is a service trolley designed to make cleaning and preparing rooms in hotels, bed & breakfasts and holiday resorts **easier, faster** and **more discreet**.

Functional and refined with attention paid to the smallest of details, KeepHotel is the **ideal solution for managing accommodations facilities**.

- Thanks to the **plain and essential style** it can be perfectly integrated into the environment in which it is used.
- Its **compact size** allows the ease of movement and access.
- It is designed to offer **maximum practicality** in facilitating various cleaning and tidying operations.
- Spacious and equipped with **useful compartments and movable dividers** to better organize all the equipment.
- Hygienic thanks to the **internal lining that can be easily removed** to facilitate cleaning.

"X" trolley for laundry collection

Thanks to the **foldable X-trolley** it is easier to handle the linen management in the accomodation facilities, assuring the **maximum confort and practicality**:

- The plastic coated bag is equipped with zip to empty the content easily
- The metal structure assures the maximum shock-proof resistance
- The pivoting wheels help to handle the trolley
- Foldable to reduce the overall dimensions, suitable also for the smallest closets
- Available with bag 200L or two bags 100L for the laundry separate collection

TROLLEYS FOR LAUNDRY COLLECTION

SILVER

Silver trolleys are practical and handy service trolleys, ideal for hotels, restaurants, company canteens and fast-food chains.

Silver is also available in the **panelled version**:

- **Higher capacity and safer:** thanks to the plastic closing walls storage possibilities and stability during transportation are surely improved, thus offering an even more efficient service
- **Smarter and more versatile:** its neat and modern design with two colour options makes it suitable for all environments
- **More hygienic and ergonomic:** thanks to its smooth surfaces with rounded up corners it can be easily cleaned and thanks to its ergonomic push-bars it can be easily handled
- **Stronger:** Silver is handy and very strong as it is manufactured with aluminium vertical frames and plastic shelves/walls (up to 50 kg per each shelf)
- **More silent:** it is available also with rubber wheels \varnothing 125 mm, highly sliding and silent, with bumpers

Versions closed by plastic panels, available in two colours

Available also with rubber wheels \varnothing 125 mm and with shock-absorbing bumpers

Ergonomic, rounded shape and plastic push-bar

NEW App: each tool in place

App is an **indispensable tool for efficiently organising tools**: available in two sizes and equipped with $\varnothing 20/30$ mm hooks and handle holders, it enables tools to be hung up once the operation is complete, providing considerable advantages.

- **Immediate control**: increases tool sight when stored
- **Optimal drying**: allows complete drying after cleaning
- **Long life**: prevents deformation, extending the life of products

The 30 and 50 cm bars can be combined with each other to **form large storage walls**, while the hook set and the wall-mounted handle holder are ideal for **efficiently organising narrow workplaces**.

■ Tool holder

APP - tool-hanging system with support for $\varnothing 20/30$ mm handles and hooks

NEW

REF.	NOTES	SIZE (cm) ↓ ↓ ↓
0000SM00409	with 2 handle holders and one hook for tools	31,5x8,5x5,5

Uni-Move: universal handle hook

Uni-Move is the handle holder by Filmop to **hang quickly and easily any type of handle** to the service trolley.

Thanks to its **special flexible structure**, Uni-Move **can be fixed in few seconds** to any tool, regardless of its shape or size.

PATENTED SYSTEM

TWO MATERIALS COMBINED TOGETHER AND RESISTANT

Made of plastic and extensible, shock-absorbing and non-slip rubber, all in one mould.

UNIVERSAL

Thanks to its original and innovating design with a flexible rubber part, it is compatible with handles of several diameters (from 21 mm to 29 mm).

FAST

It can be fixed and removed in just a few seconds.

Aura: bathroom furnishing with style!

Aura is a line of products particularly used in bathrooms.
Impeccable bathroom furnishing, elegant and functional at the same time

- **STYLE:** the products of the Aura range feature stylish materials and different shades, capable of meeting all needs and offering perfect integration in all environments
- **ERGONOMICS:** what sets Aura apart is the ergonomic design, specifically conceived to make each product intuitive and easy to use
- **HYGIENE:** Aura items and accessories have rounded shapes and smooth surfaces, making cleaning and maintenance easier and facilitating the preservation of hygiene standards

Fresh and Deluxe

Fresh e Deluxe line are characterized by a minimal design and the possibility to **customize the products** used in bathrooms by printing one's own logo in the specific inlay.
